

# New Isomil<sup>®</sup> Advance<sup>®</sup> with Omega-3 and Omega-6

## A Trusted Soy Formula You Can Count On

**References:** 1. Data on file, Ross Study AH23, November 2003. 2. Ostrom KM, Borschel MW, Westcott JE, et al. Lower calcium absorption in infants fed casein hydrolysate- and soy protein-based infant formulas containing palm olein versus formulas without palm olein. *J Am Coll Nutr* 2002;21:564-9.

- Clinical evidence supports that switching to Isomil will provide a substantial reduction in common feeding problems in most infants in 3 days<sup>1\*</sup>
- Palm olein oil-free for greater calcium absorption<sup>2†</sup> to help build strong bones and teeth

\*Common feeding problems defined as fussiness, gas, and spit up.

†Clinical study conducted with Isomil without omega-3 and omega-6.

‡Compared to a formula containing palm olein oil.
